EDUCATION

Diploma in Software Engineering
Semicolon Africa

2023 – present | Lagos, Nigeria

Masters in Business Management
Grine American University

2019 – 2020 | Girne, Cyprus

Pure and Applied Chemistry
University of Lagos

2013 – 2017 | Lagos, Nigeria

SKILLS

Programming languages

Java, Python, JavaScript, TypeScript

FrameWorks

SpringBoot, Django

FrontEnd and Mobile Technologies

ReactJS, Tailwind Css, Material UI, React-Native.

Testing

JUnit, Jest, Pytest, Mock Testing

Database

PostgreSQL, MySQL, MongoDB

DevOps Services And Tools

Render, Aws, Heroku, Vercel, Docker

Soft Skills

Strategic, design & critical thinking and problem solving.

Relationship building and networking.

Source Control

Git, GitHub, GitActions

Other Technologies

Micosoft Office, Jupyter Notebook

LANGUAGES

English

Yoruba

Turkish

PROFILE

Full-Stack Developer with a diverse background in Pure and Applied Chemistry and Business Management. Transitioned into tech, applying analytical skills and business acumen to software development. Proficient in building efficient web and mobile applications. My unique path equips me to solve problems creatively and deliver solutions that balance technical innovation with business insight.

PROFESSIONAL EXPERIENCE

Semicolon Africa, Digital Trainee

2023 – present | Lagos, Nigeria

- Utilized technologies such as Java, Python, HTML, CSS, JavaScript, Go, and React to develop software applications and web projects.
- Developed dynamic, responsive websites, built RESTful APIs, implemented backend services, and designed interactive user interfaces.
- Designed and integrated interactive user interfaces, applying these technologies across various phases of the software development lifecycle—from requirements gathering to testing, deployment, and maintenance.

Medical Data Analyst

Damilola Clinic & Maternity

2021 – 2023 | Lagos, Nigeria

- Analyzed and managed large sets of clinical data, contributing to improved patient care and operational efficiency.
- Enhanced my understanding of healthcare operations through my MSc in Business Administration, while utilizing Excel, Google Sheets, and basic SQL for data reporting.

Teaching Assistant

Girne American University

2019 – 2020 | Girne, Cyprus

- Assisted in teaching Econ 500, an advanced statistics course in the MSc Business Management program, focusing on quantitative methods, data analysis, and statistical modeling.
- Guided students in applying statistical tools such as regression analysis, hypothesis testing, and data interpretation—key skills for data-driven decision-making in tech environments.

PROJECTS

Connectivity

- Developed a service provider web app and a mobile app using Spring Boot and Maven, connecting end users to providers across four domains: Transportation, Handyman, Healthcare, and Education.
- Built APIs enabling users to browse available services, book appointments, and manage transactions seamlessly.
- Implemented features for users to explore service categories, book, update, or cancel appointments, and review service history, ensuring a smooth and user-friendly experience.

Nexcent Landing Page

- A website developed using React, which faithfully replicates a Figma design, merges the strength of React's component-driven structure with the accuracy of a carefully designed layout.
- The integration of interactive UI elements, efficient state management, and adherence to accessibility standards results in a modern, dynamic, and inclusive web application

Contact_Management

- Developed a robust backend for a user and contact management system, implementing features such as registration, login, contact creation, sharing, approval systems, messaging, filtering, and search capabilities.
- Utilized Spring Boot to create RESTful APIs, ensuring seamless interaction and data management with a MongoDB database.
- Documented the API endpoints using Postman, providing comprehensive guides for all functionalities, facilitating easy integration and testing.
